SUMMARY

I am passionate about new technologies and design, combining technical skills with an eye for detail to deliver exceptional digital experiences. I have a bachelor's degree in Computer Science from José do Rosário Vellano University, where I developed a solid foundation in programming, logic and data structures.

My career includes working in agencies specializing in digital solutions, where I was responsible for transforming layouts created by design teams into robust and scalable websites. I have extensive experience in technologies such as JavaScript, React, Next.js, HTML, CSS, TypeScript, WordPress, GraphQL, Sanity CMS and Strapi CMS.

I have worked on projects that have optimized user experience and generated commercial impact, directly contributing to the success of innovative companies and startups. With a focus on performance and scalability, I am committed to creating solutions that combine technology and design to meet the demands of the digital market.

TECHNICAL SKILLS

- HTML, CSS, JavaScript (ES6+), Typescript, React, Next.js.
- CMS Platforms (WordPress, Stripe, Sanity).
- CSS, Styled Components, Tailwind CSS, CSS Pre-processors (SASS, LESS), and Bootstrap.
- Google Analytics, GULP, RESTful APIs and Version Control (Git & GitLab)
- UX/UI Design Principles, Figma, SEO Best Practices, Wireframing and Prototyping, Cross-Browser Compatibility, Testing and Debugging, Web Accessibility (WCAG), Collaborative Tools (Slack, Trello, Notion, ClickUp), Conversion Rate Optimization (CRO), and Responsive Web Design.

WORK EXPERIENCE

Web Developer **Jun 2025 – Ago 2026**
EVO Studio Porto,Portugal

Front-End Developer at Evo Design Studio — a digital design agency with offices in Brazil, Portugal, and the US,serving startups and enterprise clients across multiple industries. At Evo, development and design work hand in hand: I translate complex UX/UI concepts into functional, production-ready web applications, ensuring every interaction feels intuitive and every component reflects the product's design system. The workflow follows an agile, user-centered process — from wireframes and user flows to final delivery — with a strong focus on quality, performance, and measurable results.

Front-End Developer **Aug 2024 – Present**
Wenex

- **Contribution to the development of innovative digital solutions:** active participation in scalable and high-performance projects, using technologies such as React and Next.js.
- **Focus on user experience:** development of modern and intuitive interfaces, prioritizing usability and accessibility.
- **Transforming ideas into products:** creating applications that connect technology and human experience to generate impactful results.
- **CMS integration for efficient management:** using Sanity to make projects manageable, facilitating maintenance and updates.
- **Delivery of customized projects:** collaboration to create unique experiences aligned with the client's objectives.
- **Commitment to quality and performance:** application of good practices to ensure scalable, easy-to-maintain solutions with excellent performance.

Front-End Developer August 2020 – November 2023
Insany Design Alfenas, Minas Gerais

- Development of responsive and pixel-perfect interfaces, ensuring fidelity to the design created in Figma.
- Performance optimization to achieve the best scores in tools that analyze the speed of web pages and suggest improvements to optimize it.
- Application of good development practices to ensure accessibility, usability and SEO.
- Close collaboration with design, backend and product teams to deliver effective and scalable solutions.

EDUCATION

Computer Science, José do Rosario Vellano University **12/2020**
Bachelor's Degree in Computer Science Alfenas, MG
